How to Insert a Security Label

No need to remove the backing. Just place the AM or RF security label flat in the security chamber.

How to Lock the Security Cap in Place

Once the security sticker is in place, take the cap in one hand and pass the two feet at the bottom of the cap through the holes in the D-Case.

Apply downward pressure on the cap using both of your thumbs. The cap will then click into place. That is it quick and neat.
