

# TGI Helpful Hints

## How to Insert the White Tag

### Method 1

Position the white tag over the corresponding cavity in the D-Case.

Hold the D-Case in both hands with the white tag pointing away from you so your thumbs are on top of the cover of the D-Case and your forefingers are resting along the tag.

Grip the D-Case firmly & apply even pressure on the tag with your forefingers until the tag snaps into place.

---

### Method 2

Hold the case in both hands with the white tag resting on the counter (or other hard surface). Your palms should be resting on the spine of the D-Case.

Press the D-Case down till the tag snaps into place

---

## How to Remove the White Tag

*Please note: The release machine should be fixed to the counter reasonably close to the counter's edge.*

Line up the edge of the D-Case containing the white tag with the corresponding cavity of the release machine.

---

Place both palms on the spine of the D-Case.

Push down firmly on the D-Case until the release unit cavity stops moving inward.

---

Remove the D-Case from the release unit and then remove the white tag.

---
